

**THE LAST
GREAT
WILDERNESS**

A slide presentation about

The Arctic National Wild

Two years in the making, this multi-projector slide presentation, **The Last Great Wilderness**, provides a close-up look at the fragile and beautiful Arctic National Wildlife Refuge in northeast Alaska. Called the "Serengeti of the North," the Refuge is home to grizzly and polar bears, arctic fox, snowy owls, tundra swans, and countless other species, as well as the Gwich'in and other native people. Each summer more than 180,000 caribou migrate across the Refuge to give birth to their calves on its coastal plain. This slide presentation captures all of the life, splendor and beauty only a vast wilderness can have.

It also features the controversy over oil development vs wilderness designation of the Refuge's coastal plain. Oil companies want to swallow up this pristine area into neighboring Prudhoe Bay. Out of 1,100 miles of Alaska's arctic coastline, the coastal plain of the Refuge is the last 100 miles not yet open to development.

Your presence at this event will help conservationists here in Washington state who are working to prevent the tragic exploitation and subsequent destruction of the Refuge's coastal plain.

The Last Great Wilderness

will show at

7:30 pm
Saturday, February 4

in the HUB Auditorium
on the campus of the

University of Washington
Seattle, WA

\$5-\$10 Donation on a sliding scale

Refreshments will be available

Producer Glendon Brunk is a wildlife biologist who has lived and worked in Alaska for 20 years. He has done extensive wildlife research in the Arctic National Wildlife Refuge and surrounding areas for the past several years. In addition to his career as a wildlife biologist he is a past world champion dog sled racer.

Chief photographer Lenny Kohm was born and raised in Seattle. He has since become a well known photojournalist with his work appearing in Audubon and other national publications. Lenny spent 2 years photographing the arctic and has combined his work with images from ten nationally recognized photographers to create this spectacular visual presentation.

The slide show will be followed by a brief question and answer session conducted by Lenny and Glendon. Both will be available to meet and mingle with afterward. They are pleased to have this opportunity to share their many arctic experiences with you.
